Subject: Microsoft Settlement

Dear microsoft.atr@usdoj.gov:

The settlement proposed by the Department of Justice leaves Microsoft ready willing and able to continue without abatement its predatory practices which have seriously undermined any of our most creative entrepreneurs' ability to bring new and creative products to the market.

Considering the degree to which Microsoft dominates the retail software market, this has had a depressing and inhibiting effect on the productivity of our most creative businesses whether or not they engage in computer related business. Business and personal software is crucial to our nation's economy and Microsoft has deliberately and illegally interfered with the normal economic growth of our nation. Justice must bring the settlement back in line with the seriousness of the offense and the predatory instincts of the offender.

sincerely

Mr. Isa Kocher
